

ECAT FOUNDATION

External quality Control for Assays and Tests

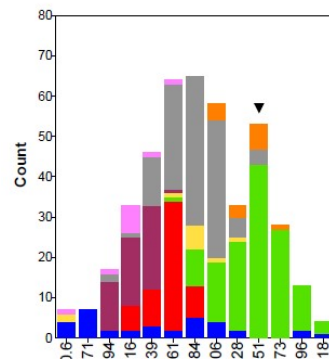

With a focus on Thrombosis and Haemostasis

The ECAT Foundation provides a programme for external quality assessment in the field of thrombosis and haemostasis to give insight into the quality of your laboratory testing in relation to other laboratories. Furthermore, it contributes to further quality improvement of contributing laboratories with respect to the diagnosis and treatment of patients.

Programme

- ▶ **Screening** (APTT, PT/INR, Fbg, TT)
- ▶ **Thrombophilia testing** (ATIII, Prot.C, Prot.S, APCr)
- ▶ **Lupus Anticoagulant / Anti-Phospholipid Ab**
- ▶ **D-Dimer**
- ▶ **Coagulation Factors I** (FVIII, FIX, FXI and FXII)
- ▶ **Coagulation Factors II** (FII, FV, FVII and FX)
- ▶ **Factor XIII**
- ▶ **Von Willebrand Factor**
- ▶ **ADAMTS13**
- ▶ **Factor VIII / FIX Inhibitor**
- ▶ **Heparin-Induced Thrombocytopenia (HIT)**
- ▶ **Thrombin Generation**
- ▶ **Fibrinolytic parameters** (Plg, PI, PAI-1 and t-PA)
- ▶ **Heparin Monitoring [UFH and LMWH]** (anti-Xa)
- ▶ **DOAC's** (Orgaran, Fondaparinux, Rivaroxaban, Apixaban, Argatroban, Dabigatran)
- ▶ **Genetic Testing**

Report Information

Clear histograms with the position of a participant clearly indicated.

Descriptive statistics with:

- Number of participants
- Mean value
- Coefficient of Variation
- Range
- Z-score
- Peer group analysis

Reports are in English

Reports are electronically available (PDF)

The ECAT programme is accredited according to ISO/IEC 17043.

Highlights

- ✓ **Comparison of your laboratory results with other laboratories**
- ✓ **Accuracy assessment by Z-score**
- ✓ **International programme** (Currently more than 1550 participants worldwide)
- ✓ **Clear reports with detailed information**
- ✓ **Peer group evaluations**
- ✓ **Modular programme**
- ✓ **One / Two / Four surveys per year** (depending on the module)
- ✓ **Biennial Participants' Meeting**
